## SKILLS

---

**Languages:** Java, JavaScript, Python, C/C++, SQL, HTML5, CSS3

**Frameworks/Libraries:** React.js, Spring Boot, Node.js, Express.js, Bootstrap

**Databases:** MySQL, PostgreSQL, MongoDB

**Tools:** Git, GitHub, REST APIs, JWT, JUnit, Putty, JBoss

**Concepts:** Authentication, RESTful APIs, MVC, Agile

**Core CS:** Data Structures and Algorithms, OOPS, DBMS, Operating Systems, Networking

## EDUCATION

---

Bachelor of Technology

Sep 2021 – Jun 2025 | Chennai, Tamil Nadu, India

SRM Institute of Science and Technology

Major: Computer Science and Engineering

CGPA: 7.77

## EXPERIENCE

---

**APPRENTICE - TECHNOLOGY** | Standard Chartered GBS

Chennai | July 2025 – Present

- Improved UT (Unit Test) coverage by developing and maintaining JUnit test cases across multiple repositories.
- Implemented CSR fixes, improving service consistency and reliability.
- Worked on PT (penetration test) issue fixes, enhancing security compliance across services.
- Contributed to Spring Framework upgrade efforts to improve application stability and compatibility.
- Supported migrations from JDK 8 to JDK 17 and JUnit 4 to JUnit 5, improving build success and test performance.
- Collaborated in Agile teams to deliver high-quality sprint deliverables within deadlines.

**AMAZON WEB SERVICES (AWS)** | Cloud Computing Intern

Remote | Sep 2023 – Nov 2023

- Completed a remote internship focused on core AWS services including EC2, S3, and Lambda through hands-on projects and assignments.
- Built and deployed a cloud-based application, gaining experience in designing scalable, secure cloud solutions.
- Practiced key cloud computing concepts such as IAM policies, storage architecture, and serverless deployment.

## PROJECTS

---

**RW Tool - Full Stack (2025)**

React.js, Java, Spring Boot, PostgreSQL

- Developed a responsive React.js web portal enabling clients to search, filter, and generate financial reports across custom date ranges (Daily, Weekly, Monthly) with personalized bookmarking; engineered a Java and Spring Boot backend with REST APIs to handle automated file processing and real-time data transfers between source systems and the Report Warehousing (RW) tool.
- Designed a PostgreSQL schema to manage user preferences and report metadata; integrated Role-Based Access Control (RBAC) via Active Directory groups to ensure secure data isolation across different user tiers.

**Object Detection in Dashcam Using YOLO-Machine Learning (2025)**

Python, Data Processing, YOLO, Computer Vision

- Developed an object detection system capable of identifying and localizing multiple objects in real-time from images or video streams.
- Provided bounding boxes and labels for each object in applications such as surveillance, autonomous driving, and image classification.

## CERTIFICATIONS

---

- **Certified Application Developer (ServiceNow)**

As a ServiceNow Certified Application Developer, I possess the skills and essential knowledge to design, develop, and implement custom applications on the ServiceNow platform.
